Manas Khairnar

Software Developer | Mobile, Backend & AI Systems

+91 93252 33287 · manaskhairnar1511@gmail.com · Pune, India
Portfolio · GitHub · The Interview Room · LinkedIn · LeetCode · Hugging Face

PROFILE

Software engineering student with production experience leading mobile application development and contributing to backend systems. Built and shipped API-driven products, multi-agent AI systems, and automation tools; 4x hackathon winner with hands-on cloud and DevOps experience.

EXPERIENCE

App Development Lead Intern | **Aionyix** *2026 - Present*

- Lead development of MFD Stack's production mobile application, owning feature delivery, architecture decisions, API integration, performance, and release readiness.
- Contribute to backend services and production workflows across APIs, data handling, and system integration to deliver reliable end-to-end features.

Product: **MFD Stack**

App Developer Intern | **Scizers** *Sep 2025 - Feb 2026*

- Helped build RealEdge from the ground up into a production CRM application for real-estate professionals, delivering core mobile features and backend API integrations.
- Improved UI responsiveness, cross-device performance, real-time data flows, and overall user experience through production-focused development and testing.

Live app: **RealEdge on Google Play**

SELECTED PROJECTS

WebGenie | **TypeScript · React · Chrome MV3 · Multi-Agent Systems**
Local-first browser automation extension with planner, navigator, and validator loops, DOM compression, persistent task context, and secure browser-action execution.

Outreach AI | **Python · FastAPI · LangGraph · Node.js · Ollama**
Local-first multi-agent platform for prospect research, profiling, strategy, multi-channel drafting, critic-based quality checks, memory, and text-to-speech.

AssistFlow AI | **Node.js · React · MongoDB · RAG · Vector Search**
Full-stack support platform with website crawling and indexing, AI and human support, ticket management, and an embeddable chat-widget package.

The Interview Room | **Web · Community Platform**
Built an interview-experience sharing platform used by more than 210,000 unique visitors.

CollabSphere | **React · Node.js · MongoDB · Socket.IO · Semantic Search**
Developer collaboration platform with real-time chat, AI-assisted project planning, skill-gap analysis, and candidate-role matching.

TECHNICAL SKILLS

Languages	Java, JavaScript/TypeScript, Python, Kotlin, Shell
Backend & Data	Node.js, Express.js, FastAPI, Spring Boot, REST APIs, MongoDB, PostgreSQL, Qdrant
Mobile & Web	React Native, React, Jetpack Compose, Chrome Extensions
AI & ML	LangChain, LangGraph, LlamaIndex, Hugging Face, PyTorch, TensorFlow, RAG, TFLite
Cloud & DevOps	Docker, Kubernetes, Terraform, GitHub Actions, AWS, GCP, Linux, Git

EDUCATION

B.E. Computer Engineering | **PICT, Pune** *2024 - 2028*

LEADERSHIP & ACHIEVEMENTS

Tech Head - PICT INC
Tech Team Member - Startup & Innovation Cell, PICT
Member - PICT ACM Student Chapter
4x Hackathon Winner - AI, backend, and app development
Published Model - Fine-tuned Qwen 0.5B for natural-language-to-shell translation
